"Can be depended upon" is an expression we all like to hear, and when it is used in connection with Chamberlain's Colic, Cholera and Diarrhoea Remedy it means that it never fails to cure diarrhoea, dysentery or bowel complaints. ## OLD TIME PUNISHMENT.

**Agency of a Day in the Stocks For a Fit of Bad Temper.**  
A record on file in the library of congress contains an account of the adventures of a certain Hubbard, who was sentenced in Boston to the stocks for having indulged in an unwarrantable fit of ill temper, says Harper's Weekly. When he had taken his seat for the day there came along a drove of swine, which seemed to cast upon him those leering looks that only a fat pig can bestow. A dog followed, sniffing at the prisoner's feet and making felts—unpleasantly approaching reality—of biting him. Then a cock, mounting to the very top of the stocks, crowed his derision upon the victim below, and presently a rough fellow, after indulging in ugly taunts, threw at him field toadstools and a dead snake.  
Then an Indian appeared, who in a drunken rage, stimulated by some fancied injury, rushed at Hubbard with a tomahawk, probably intending nothing worse, however, than to give him a severe fright, which he certainly succeeded in doing.  
Help came from an unexpected quarter, for at that moment an old bull came tearing down the road. His attention was attracted by the stocks, and with a roar he prepared for a charge.  
Alarmed in his turn, the savage dashed off. The bull made a dash at the stocks and carried away the corner post, but without even grazing the object of his apparent wrath. Whether he was disgusted by the little he had accomplished or his animosity was thus satisfied, he started off, bellowing and shaking his head, much to the relief of the said Hubbard.  
And then the unfortunate man was left in comparative peace to his own meditations and the cutting sleet of a November day.

## A COURSE OF DINNERS.

It includes Roasted Peas as a Substitute For Coffee.  
In a little book called "The Economical Housekeeper," published about the year 1840, there is given on one page "A Course of Dinners For a Week." At the time of its publication the little book was most popular, as is proved by the author's preface to the second revised edition. She says:  
"Encouraged by the very favorable reception that our humble labors have met in the rapid sale of the first edition of 1,500 copies in about fifteen weeks, and the demand still continuing, we have improved the time by endeavoring to make the present edition more worthy of patronage, if possible, than the first."  
Therefore it is probable that the "course of dinners" which follows was considered admirable at that time:  
"Monday—Tea, coffee or cocoa, with mince meat, bread and butter in winter, bread and milk in summer.  
"Tuesday—Rolled dish, with apple dumplings.  
"Wednesday—Roasted or baked meat, with bread pudding.  
"Thursday—Broiled steak or fresh fish, with baked rice pudding.  
"Friday—Baked beans, with baked Indian pudding.  
"Saturday—Salt codfish boiled, with apple pie.  
"Sunday—Morning, hashed fish and coffee; noon, bread and butter, cheese, pie, doughnuts."  
It is a suggestive paragraph which appears on the same page:  
"Peas, roasted and ground, are an excellent substitute for coffee, and you would hardly know which is best."—Youth's Companion.  
Value of the Kangaroo's Tail.  
So important is the kangaroo's tail in his rapid progress that experienced hunters with guns are accustomed to fire at the point where this appendage joins the body, when, the tail being disabled for its office of balancing, the animal is as effectually stopped as if hamstrung. Hit elsewhere, except with a rifle bullet or at point blank range, the kangaroo is pretty likely to get off. One peculiarity of the kangaroo is that, after being started up, he very rarely swerves from his course, through which peculiarity he is easily "potted" by hunters, who conceal themselves while a man on horseback drives the herd toward them.

**Insect Wonders.**  
Nothing can exceed the perfection of the minutest parts of the insect organization in general. The finest strand in a spider's web, which can scarcely be seen, is said to be composed of no less than 4,000 threads. On a single wing of a butterfly have been found 100,000 scales and on that of a silkworm moth 400,000, each of these minute scales being a marvel of beauty and completeness in itself. So thin are the wings of many insects that 50,000 placed over each other would only be a quarter of an inch thick, and yet, thin as they are, each is double.

**Puzzled Tommy.**  
"Pa," said Tommy, "my Sunday school teacher says if I'm good I'll go to heaven."  
"Well, what about it?" said his pa.  
"Well, you said if I was good I'd go to the circus. Now, I want to know who's fibbing, you or her?"—Lippincott's.

**The Similarity.**  
"Lucky at cards, unlucky at love," quoted the wise guy.  
"Well, either is simply a case of holding hands," said the simple mug.—Philadelphia Record.

To encourage talent is to create it.—Lansing.
